This animal sounds exactly like a Dinosaur!
If God was able to design such an
amazing animal, then Job knew
that God could help him too!
Job was sick and he didn’t think God could help him. One day God spoke to Job and told him how He alone had created a huge animal called Behemoth.

Behemoth was the biggest animal that God ever created. It was bigger than a whale or an elephant and hunters couldn’t kill it with a sharp sword.
God said that He made its legs to be powerful, with bones as strong as iron, that did not break. People were scared if this mighty animal.

He told Job that this enormous animal ate grass, just like a cow and it liked to lie down under the shade of a tree.
He said that it was very big and very strong and that this animal He had created was powerful and had a huge body.

It had a long thick tail, which was also very strong, and was just like the thick trunk of a big cedar tree.
