

Moneyfish craft

You can use a real coin for this, or glue the coin design on to some thick cardboard to give it some weight.

Fold the fish shape on the dotted line and glue **JUST THE EDGES** from the mouth back, to make a pocket.

Glue or tape some string to the coin, and stick the other end of the string to the inside of the fish.

Now you can be just like Peter, and find a coin inside the mouth of a fish.
